

Replication README file for Temperature and Child Maltreatment by Mary F. Evans, Ludovica Gazze, and Jessamyn Schaller

Overview

The replication package includes Stata do files and data files as well as R scripts to generate the figures and tables that appear in the paper and online appendices. The package also includes output files for results reported in the paper and online appendix. The Stata code was run on a server using Stata/MP 18.0 for Windows (64-bit x86-64). R scripts were run on a server using RStudio Server (version 4.3.2).

Data Availability

The following data files are required for the analysis and are provided in the Data folder unless otherwise indicated. Some data **cannot be made** publicly available.

Data file	Source	Notes	Provided
data/raw/CF2006v5.dta	NDACAN	Confidential	No
data/raw/CF2007v6.dta	NDACAN	Confidential	No
data/raw/CF2008v5.dta	NDACAN	Confidential	No
data/raw/CF2009v6.dta	NDACAN	Confidential	No
data/raw/CF2010v5.dta	NDACAN	Confidential	No
data/raw/CF2011v5.dta	NDACAN	Confidential	No
data/raw/CF2012v5.dta	NDACAN	Confidential	No
data/raw/CF2013v5.dta	NDACAN	Confidential	No
data/raw/CF2014v4.dta	NDACAN	Confidential	No
data/raw/CF2015v4.dta	NDACAN	Confidential	No
data/raw/CF2016v3.dta	NDACAN	Confidential	No
data/raw/CF2017v1.dta	NDACAN	Confidential	No
data/raw/CF2018v2.dta	NDACAN	Confidential	No

Notes on data availability:

data/raw/CF2006v5.dta - data/raw/CF2018v2.dta

The National Child Abuse and Neglect Data Systems (NCANDS) Child Files for FFY 2006-2018 were obtained through a restricted data agreement with the National Data Archive on Child Abuse and Neglect (NDACAN). For each file, the version is provided at the end of the filename above. Members of the research community can apply for access to the NCANDS Child Files by following the procedures outlined here: <https://www.ndacan.acf.hhs.gov/datasets/request-restricted-data.cfm>

data/raw/PctUrbanRural_County.xlsx

Used to calculate rurality by county. Accessed on July 1, 2024 from <https://www.census.gov/programs-surveys/geography/technical-documentation/records-layout/2010-urban-lists-record-layout.html>

data/raw/State reporting to NCANDS by year.xlsx

Researcher-generated dataset based on information from the National Data Archive on Child Abuse and Neglect (NDACAN).

data/raw/climate_zones.csv

Climate zones by county from <https://gist.github.com/philngo/d3e251040569dba67942>. Accessed March 8, 2024.

data/raw/ac_fips_year.dta

Residential air conditioning penetration by county and year from Park et al. (2020). See discussion on their p. 314 and footnote 11 for details. We received these data from Jisung Park via email on 11/2/2022.

data/raw/atus_ipumsraw.dta

IPUMS Time Use samples 2003-2022 from <https://www.atusdata.org/atus/>. Extract created Feb 07, 2024.

data/raw/tl_2010_us_county10.shp

US Census TIGER/Line county shapefiles (2010 boundaries) used to assign weather data to counties. Downloaded on May 25, 2022.

data/raw/usgrid_data_2000/geotiff/uspop00.tif

US Census gridded population data used to weight gridded weather data to assign to counties. Downloaded on December 19, 2023.

data/derived/NCANDS_balanced_panel.dta

This data file is required for all maltreatment results reported in the paper and is produced using the procedure described below. We received permission to make these aggregate data publicly available from NDACAN.

data/raw/start05/pptyyyyymmdd.zip data/raw/start05/tmaxyyyymmdd.zip data/raw/start05/tminyyyymmdd.zip
where yyyymmdd goes from 20050101 to 20151231

These data files are downloaded from the PRISM ftp in the code provided. We do not provide them directly in the replication package due to their large size.

data/raw/historical/zipped/tmaxyyyymmdd.zip where yyyymmdd goes from 19810101 to 20011231

These data files are downloaded from the PRISM ftp in the code provided. We do not provide them directly in the replication package due to their large size.

data/raw/CMIP6/daily/. data/raw/CMIP6/historical/daily/. data/raw/CMIP6/midcentury/daily/.

These data files are downloaded from the COPERNICUS API in the code provided. They include data projections in .nc format. File names reflect relevant dates and the underlying climate model. We do not provide them directly in the replication package due to their large size.

Computational requirements

The R scripts were run on RStudio Server hosted by NBER, version 4.3.2. Approximate run times provided below.

Stata code was run with Stata/MP version 18.0. Approximate run times provided below.

The Stata code was last run on a Windows 11 Enterprise desktop computer with 64-bit operating system; installed RAM: 32.0 GB; processor: Intel(R) Core(TM) i9-10900 CPU @ 2.80GHz 2.81 GHz.

Description of programs/code

Programs in replication/code prepare the data and generate tables and figures in the paper and appendices.

Instructions to Replicators

Install 5 Stata packages using the following code:

```
maptile_install using "http://files.michaelstepner.com/geo_county2014.zip"  
ssc install binscatterhist  
ssc install addplot  
ssc install ftools  
ssc install gtools
```

Install the following R packages using the following code:

```
install.packages('raster')  
install.packages('sp')  
install.packages('sf')  
install.packages('data.table')  
install.packages('reshape2')  
install.packages('lubridate')
```

```
install.packages('dplyr')
install.packages('maptools')
install.packages('rgeos')
install.packages('rgdal')
install.packages('exactextractr')
install.packages('ncdf4')
install.packages('ncdf4.helpers')
install.packages('ecmwf')
install.packages('chillR')
install.packages('akima')
```

Run the following code files in the order that appears below to create the data files necessary for the analysis. You will likely need to confirm the correct paths for some files given constraints on file sizes imposed by Dataverse.

- Run code/ncands_panel.do
 - Run time: 30 minutes
- Run code/controls.do
 - Run time: <1 minute
- Create folder data/raw/start05 and data/unzipped and data/temp and run code/link_prism_ctypop_2005_2017.R
 - Run time: a few days.
- Run code/clean_PRISM_RESTAT.do
 - Run time: <2 hours
- Run code/link_prism_cty.R
 - Run time: a few days
- Run code/append_PRISM_balancedcounty_bycal_spatavg.do
 - Run time: <2 hours
- Create folder data/raw/historical/zipped and data/raw/historical/unzipped and run code/link_prism_historical_spatavgpop.R

- Run time: a few days
- Create folder `data/raw/CMIP6/historical/daily` and `data/raw/CMIP6/historical/daily/processed` and run `code/link_cmip6_Nspatavgpop_hist.R`. This code requires a user name and key obtained through registering with the COPERNICUS API. Instructions are under details at this page https://search.r-project.org/CRAN/refmans/chillR/html/download_cmip6_ecmwfr.html
 - Run time: a few days
- Create folder `data/raw/CMIP6/daily` and `data/raw/CMIP6/daily/processed` and run `code/link_cmip6_Nspatavgpop.R`. This code requires a user name and key obtained through registering with the COPERNICUS API. Instructions are under details at this page https://search.r-project.org/CRAN/refmans/chillR/html/download_cmip6_ecmwfr.html
 - Run time: a few days
- Run `code/merge_cmip6_spatavgN.do`
 - Run time: <2 hours
- Create folder `data/raw/CMIP6/midcentury/daily` and `data/raw/CMIP6/midcentury/daily/processed` and run `code/link_cmip6_Nspatavgpop.R`. This code requires a user name and key obtained through registering with the COPERNICUS API. Instructions are under details at this page https://search.r-project.org/CRAN/refmans/chillR/html/download_cmip6_ecmwfr.html
 - Run time: a few days
- Run `code/merge_cmip6_spatavgN_midcentury.do`
 - Run time: <2 hours

Then, run the following do files to produce all of the tables and figures that appear in the paper and online appendices.

- Run `code/main_results.do` to produce all figures and tables in the paper and appendix except Figures 3, 4, A6, A11, A12 and A13.
 - Run time: <1 minute
- Run `code/ac_figures_3_and_A11.do` to produce Figure 3 and Appendix Figure A11.
 - Run time: <1 minute
- Run `code/robustness_figure_A6.do` to produce Appendix Figure A6.
 - Run time: <1 minute
- Run `code/atus_figure_A12.do` to produce appendix Figure A12.
 - Run time: <1 minute

- Run `code/climate_projections_figures_4_and_A13a.do` to produce Figure 4 in the paper and Figure A13a in the appendix.
 - Run time: 56 minutes
- Run `code/climate_projections_figure_A13b.do` to produce Figure A13b in the appendix. Must run `code/climate_projections_figures_4_and_A13a.do` before running this file.
 - Run time: 34 minutes

List of tables and programs

Figure/table output file name	As appears in paper/appendix	Code to produce
<code>allegations_4_per_ctybiweek_date_styear_2wks</code>	Figure 1, panel (a)	<code>main_results.do</code>
